

007 for Bowls Club

VANDALISM AT KARINGAL B/C

The first 007 Bentgrass Bowling Green has just completed it's first year of competition after an interesting start.

The Karingal Bowling Club's green(in Melbourne's S/E Suburbs) was sown in May 2006 (10th). This is considered late in the Melbourne climate where the onset of winter occurs quite rapidly.

Germination was noticed at 10 days ,but after 3 weeks vandals got onto the green and damaged the surface to the extent of some concern. The areas were patched as best as possible ,then again vandals entered and more damage was inflicted.

This forced the Club into investing in a security system which became an efficient asset in keeping the vandals at bay

The green came into play in Mid-October and after 5 months of bowling in a drought year ,the green is now mature and presenting a worthwhile surface.
