

Ten Reasons Not To Use Pennncross

1. Pennncross does not produce a dense turf.
2. Pennncross does not produce a fine leaf texture.
3. Pennncross does not provide a uniform turf.
4. Pennncross produces purple colour in cool temperatures.
5. Pennncross produces excessive grain.
6. Pennncross has not performed well in evaluation trials.
7. Pennncross does not compete well when interseeded into a *Poa annua* turf.
8. Pennncross is less competitive against *Poa annua*.
9. Pennncross does not tolerate a low height of cut.
10. A superintendent has many variety options that perform better than Pennncross.
