

NZ Brown Top var Punawai

- Punawai creeping browntop is a new variety selected from ecotype plants which have evolved from properties on the Ashburton County in New Zealand.
- Punawai has underground rhizomes with fine green leaves and a strong growth habit.
- It will survive in a wide range of pH situations and shows good disease resistance, and tolerance to a wide range of chemicals.
- Punawai withstands variable cutting heights and shows good recovery in high wear situations from it's strong root structure.
- Punawai can be used on Golf fairways, roughs, home lawns, and many turf areas where persistence and ability to recover from damage is a requirement.
- **Sowing Rates** : 3 - 4 kgs per sq/m for new sowing, or 2 - 3 kgs overseeding.
