

Adseed GOLD Turf Seed Blend

Adseed GOLD Blend is a high performance mix, combining the best qualities of three premium ryegrasses. It features the fine texture of SR4600, brilliant deep green of All Star II and the excellent cool weather performance of SR4220.

“For premium turf make your choice GOLD.”

Seed Mixture By Count

34% SR4600 Turf Type Ryegrass

33% SR4220 Turf Type Ryegrass

33% AllStar II Turf Type Ryegrass

ENDOPHYTE

Adseed GOLD exhibits very high endophyte levels, enhancing resistance to ground feeding insects, as well as promoting heat & drought tolerance.

Adseed GOLD is textured, dense clean cutting turf with exceptional deep green colour. It is ideal for new establishment or oversowing quality sportsfields, particularly in early Spring. It is highly recommended to further blend passive areas with a Bluegrass, Tall Fescue or Couch.

SOWING & ESTABLISHMENT

For new sowing, a rate of 3-4kg per 100m² is recommended. For oversowing, a percentage of this rate should be applied proportionate to the amount of existing turf cover. For moderate existing cover, apply at half the new seeding rate. During sowing activity, a complete starter fertilizer is recommended at label rates to initiate rapid establishment.

MAINTENANCE

Adseed GOLD Blend can be mowed as low as 10mm, however the recommended to sustain a healthy sward.
