

1001-B PRECISION SEEDER

1001-B plants at precise depth, a precise spacing, and covers and packs all in one operation. Eliminating the problems of seed rot and skipped plants.

An ideal row crop planter, the 1001-B is a tool that takes the guesswork out of planting any row crop. Here's how it works: install one of the precision seed plates that best fits your seed, then adjust the depth of planting on the ground opener, and then set your 30" long row marker for the desired width, then fill the seed hopper with seeds, then begin pushing in your well tilled soil, that's it. The results will speak for themselves when days later you look at your garden and see all the row crops come out of the ground at the same time; perfect, making you the envy of all gardeners who don't have the 1001-B.

Standard Seed plates included with the 1001-B are: 18100 Sweet Corn, 18101 Radish, Leeks, Spinach, 18102 Carrots, Lettuce, Turnips, 18103 Beans, Small Peas, 18104 Jumbo Peas, 18105 Beets, Okra, Swiss Chard.

A range of optional accessories are available including the Seed Plate Kit part #60010, includes 18108 Light Carrot, 18109 Broccoli, 18110 Cucumbers, 18112 Popcorn, 18124 Lima beans. Also available is a Blank Seed Plate 18106 that allows you to make a custom plate for a particular seed or seed spacing requirement.
