

Greenstar Turf Seed Blend

Greenstar Blend brings together all the essential qualities required for a premium turf surface. Our carefully selected varieties have all performed admirably in the harsh Australian climate.

“The Perennial Ryegrass Blend when quality, performance & value are essential.”

Seed Mixture By Count

- 34% Allsport Turf Type Ryegrass
- 33% Keystone Turf Type Ryegrass
- 33% Pacesetter Turf Type Ryegrass

AUSTEP

Allsport was recently trialled in the AUSTEP ryegrass turf trials, performing extremely well in qualities desired in turf varieties. *Allsport* rated equal number 1 variety for colour & density (*Werribee Park Golf Club*).

Keystone was bred for winter growth, superior heat & humidity tolerance.

Pacesetter is a fine leaf, dense dark green variety.

SOWING & ESTABLISHMENT

For new sowing, a rate of 3-4kg per 100m² is recommended. For oversowing, a percentage of this rate should be applied proportionate to the amount of existing turf cover. For moderate existing cover, apply at half the new seeding rate. During sowing activity, a complete starter fertilizer is recommended at label rates to initiate rapid establishment.

MAINTENANCE

Greenstar Blend be mowed as low as 10mm, however the recommended mowing height in most applications is 25mm.

Seasonal application of a balanced NPK fertilizer is recommended to sustain a healthy sward.
