

Greenstar PLUS Turf Seed Blend

WITH
GRANULAR
WETTING AGENT

Greenstar Plus Blend brings together all the essential qualities required for a premium turf surface. Our carefully selected varieties have all performed admirably in the harsh Australian climate.

Greenstar Plus contains granular wetting agent which greatly improves water repellency, thus providing uniform wetting of all soils.

"The Perennial Ryegrass Blend when quality, performance & value are essential."

Seed Mixture By Count

40% Attribute Turf Type Ryegrass

30% Keystone II Turf Type Ryegrass

30% Wayfarer Turf Type Ryegrass

With 20% (by weight) Granular Wetting Agent

NTEP

Attribute was recently trialled in the NTEP ryegrass turf trials, performing extremely well in qualities desired in turf varieties. Attribute rated highly for summer density and fine leaf texture.

Wayfarer was bred for dark green colour with a fine leaf texture.

Keystone II is a high disease resistant variety with increased density and summer performance.

SOWING & ESTABLISHMENT

For new sowing, a rate of 3-5kg per 100m² is recommended. For oversowing, a percentage of this rate should be applied proportionate to the amount of existing turf cover. For moderate existing cover, apply at half the new seeding rate.

During sowing activity, a complete starter fertilizer is recommended at label rates to initiate rapid establishment.

MAINTENANCE

Greenstar Blend be mowed as low as 10mm, however the recommended mowing height in most applications is 25mm. Seasonal application of a balanced NPK fertilizer is recommended to sustain a healthy sward.
