Kingborough Ovals

Kingborough Council in Southern Tasmania have begun work on their new Sporting facilities.

Situated in Kingston, Hobart, there was a demand for better quality sports facilities in an area of population growth.

Two ovals were constructed, one purely for football, and the other a cricket oval with a new turf wicket.

Nick Hanson of Total Turf Solutions P/L won the contract and engaged the services of Doug Ollington of Tas Turf Solutions to recommend the seed blends.

SR4220 Fine Ryegrass was chosen for it's dark colour and quick establishment for the cricket ground ,and a blend of SR4600 and Essence Fine Ryegrass with it's winter activity ,was used on the football oval.

Initial seed establishment has pleased everyone ,so much so the Tasmania Football Association are considering gaining usage for it's major games.

These 2 ovals are proving to be the yardstick of sportsfield construction.
