

LA PRIMA XD COUCHGRASS

La Prima XD couchgrass with X-treme Density is a blend of superior couchgrass cultivars selected for fast germination and establishment combined with the highest turf quality. This blend combines La Prima, a couchgrass blend with fast establishment, and turfgrass quality, with Royal Bengal for disease resistance and superior dark green colour.

Features:

- Excellent turf quality
- Fast germination for rapid cover
- Vibrant, dark green colour
- Drought tolerant
- High winter hardiness

Benefits:

- Adapted for all maintenance levels
- Excellent wear tolerance
- Tolerates poor quality and effluent water
- Rapid divot recovery
- Uniform turf surface
- High fertiliser efficiency
- Withstands variable soil conditions

Seeding Rates:

- New Turf: 0.75–1.5kg per 100m²
- Repair: 0.5kg–1kg per 100m²

Sowing Rate:

- New Lawns: 1kg per 100m²
- Overseeding: 0.5–0.75kg per 100m²
- Optimum sowing conditions 25–30°C

Establishment:

- Germination 5–7 days
- First Mowing 18–21 days
- Full Coverage 4–6 weeks
