

# PR8821 PERENNIAL RYEGRASS

An improved 'dwarf-type' perennial ryegrass developed for low growth, fine leaf texture, active winter growth and excellent shade tolerance – ranking first in 1994 NTEP Shade Trials. It is a bright green cultivar that exhibits superb turf quality while maintaining disease resistant traits.

PERENNIAL RYEGRASS SEED RANGE

### Adaption:

PR8821 was developed for permanent poly-species turfgrass blends and mixtures containing improved perennial ryegrass; Kentucky bluegrass; chewings, slender creeping and strong creeping red fescue, colonial bentgrass and turf type tall fescue. It's also used extensively in winter overseeding programs on green tees and fairways either alone or in species mixtures.

### Features:

Bright green colour, rapid establishment, fine bladed leaves, active winter growth, shade tolerant, excellent density, good wear tolerance, excellent disease resistance.

### Uses:

Sports fields, golf courses, home lawns, landscaping.

### Seeding rate:

Sowing Rate: 3-4kg / 100m<sup>2</sup>  
Over sowing: 2-3kg / 100m<sup>2</sup>

### Seeding rate:

3-4kg / 100m<sup>2</sup>

Growth Habit	Bunch
Establishment Rate	Fast 7-10 days
12.7mm cut tolerance	Very Good
Mowing frequency	Twice weekly
Traffic Tolerance (Brinkman)	Very Good
Thatch Production	None
Comp Mix.	Fair-Good
Nitrogen Required	Medium-High
Shade tolerance	Fair-Good
Cold tolerance	Fair-Good
Drought tolerance	Fair
ET Rate mm/day	High 9-10
Endophyte	No
Salinity Tol mmhos	<11 Good
