

PREMIUM LAWN SEED BLEND

When only the best will do. Ideal for home lawns, landscape areas or where any premium surface is needed.

Premium blend will provide a fine textured lawn with excellent dark green colour and appearance. It is capable of withstanding high wear and tear with excellent recovery.

Seed Mixture By Count:

- 40% Kentucky Bluegrass
- 30% SR4660ST Fine Ryegrass
- 30% Sox Fan Fine Ryegrass

Application:

- New Sowing: 30-40 g/m²
- Oversewing: use approx half new sowing rate

Ten steps to a great lawn:

- 1 Remove any undesirable grass types or weeds.
- 2 Lightly till soil if necessary.
- 3 Add a quality soil such as sandy loam where required to a depth of 100-150mm. Remember your lawn will only perform as well as the soil it is grown in.
- 4 Level area in preparation for seeding, allowing sufficient fall for water run off.
- 5 Carefully measure your area, (length x width) to ensure you have the correct amount of seed for your project. Remember insufficient seed could result in a sparse lawn.
- 6 Apply a suitable turf starter fertilizer (NPK) to ensure your young seedling has sufficient nutrient to establish.
- 7 Carefully select your lawn seed taking into account your desired objectives. Sow seed at the recommended label rates. Better results are NOT gained by using excessive amounts.
- 8 Lightly rake and or roll the area to ensure your seed is in contact with the soil. Be sure not to bury your seed, 3-5mm depth is sufficient.
- 9 When your lawn requires mowing remember to remove only 1/3 of the leaf at any one time and follow suggested mowing heights.
- 10 To remain healthy and strong your lawn will require adequate amounts of fertiliser and watering. We strongly advise to over-sow your lawn 1-2 times per year to maintain a dense lawn.
