

REGAL 5

Turf Perennial Ryegrass

Heat Tolerance	Wear Tolerance	Colour	Disease Resistance
			good

- Outstanding Colour Performance
- Excellent Density

REGAL 5 is an elite perennial ryegrass variety. ANTEP results indicate that REGAL 5 is one of the darkest varieties now available. It has a dense growth habit and excellent overall turf quality. REGAL 5 has also demonstrated strong resistance to both gray leaf spot and brown patch.

REGAL 5 was developed for permanent poly-species turfgrass blends and mixtures containing improved perennial ryegrass; Kentucky bluegrass; chewings, slender creeping and strong creeping red fescue, colonial bentgrass and turf type tall fescue. REGAL 5 is also used extensively in winter overseeding programs on sportsfields, tees and fairways either alone or with other elite turf type ryegrasses.
