

# REGAL 5

## Turf Perennial Ryegrass

| Heat Tolerance | Wear Tolerance | Colour | Disease Resistance |
|----------------|----------------|--------|--------------------|
|                |                |        | good               |

REGAL 5 is an elite perennial ryegrass variety. NTEP results indicate that REGAL 5 is one of the darkest varieties now available. This allows it to blend well with Kentucky bluegrass. It has a dense growth habit and excellent overall turf quality. REGAL 5 has also demonstrated strong resistance to both gray leaf spot and brown light. REGAL 5 was developed for permanent poly-species turfgrass blends and mixtures containing improved perennial ryegrass; Kentucky bluegrass; chewings, slender creeping and strong creeping red fescue, colonial bentgrass and turf type tall fescue. REGAL 5 is also used extensively in winter overseeding programs on greens, tees and fairways either alone or in species mixtures.
