

BULLSEYE TALL FESCUE

Bullseye has been one of the leading improved tall fescue varieties. It has a natural green colour, fine leaf blade, and very good brown patch disease resistance based on the 2008 NTEP tall fescue trial.

Features:

- No.1 top performer in turf trials NTEP 2007–2011
- Rated No.1 tall fescue overall 2010 NTEP trials
- High endophyte for added stress tolerance
- Beautiful deep green colour and leaf texture
- Drought and heat tolerant, disease resistant
- No.1 top performer in traffic tolerance for sports turf

Uses:

- Well suited for home lawns, commercial turf and general turf areas

Benefits:

- High wear tolerance
- Stress tolerant
- Customer satisfaction

Seeding Rates:

- New Establishment: 4–5kg per 100m²
- Overseeding: 3–4kg per 100m²

Establishment:

- Germination 7–10 days under ideal conditions
- First mowing 21–30 days
