

TURF WICKET BLEND

Turf Wicket blend has the ability to strike quickly in low temperatures which is vital with early renovation & sporting fixture schedules.

Seed Mixture By Count:

- 35% SR4660ST Elite Fine Perennial Ryegrass
- 35% Bonneville Elite Fine Perennial Ryegrass
- 30% Axcella II Annual Turf Type Ryegrass

Turf Wicket's unique transitional ability will allow couch to move through your wicket table as temperatures increase.

Bonneville is a quick establishing, low growing perennial ryegrass that tolerates high traffic. Bonneville has shown high levels of salt tolerance which is a huge advantage for turf wicket establishment.

SR4600ST is an attractive endophyte enhanced variety with extremely high levels of salt and drought tolerance.

Axcella II Annual Turf Type Ryegrass is a premium oversowing turf annual ryegrass. It has the ability to germinate fast in cooler conditions and provides a durable winter cover over warm season grass turf surfaces.

Sowing Rates:

3–5kg/100m²
