

COMPADRE ZOYSIA GRASS

Zoysia grass is a warm season grass that stands up to heat, drought and heavy wear and tear. This means its active growth starts in early or late spring, depending on location and peaks in the hot summer months.

Compadre Zoysia grass is an improved variety that has good green colour, texture and density.

Features:

- Bred for fast germination and establishment
- Good density for reduced weed invasion
- Salt and drought tolerant

Uses:

- Ideal choice for commercial landscapes and home lawns

Benefits:

- Early spring green-up
- Lower maintenance, use less fertiliser and water
- Faster establishment than sprigs or plugs

Sowing Rate:

- New Lawns: 0.5–1kg per 100m²
- Optimum sowing conditions 25–30°C

Establishment:

- Germination 15–20 days under ideal conditions
- First mowing when reaches 5cm in height
