

F80 COMMERCIAL BROADCAST SPREADER

The New F80 is the first model in the FLEX-SELECT® Series of broadcast spreaders. Built on the chassis of our very popular 2150/2170 line of spreaders, the F80 is ideal for all broadcast spreading jobs, and with adding one of the optional Interchangeable Trays, you can customise your F80 to spread anything from low SGN to high SGN materials accurately - fine grass seed to coarse rock salt and everything between.

Engineered for extremely accurate application rates, easy operation and long life, with the EV-N-SPRED® FLEX-SELECT® Interchangeable Tray System, you can select one of three optional uniquely suited 'trays' which include precision engineered apertures and shut-off systems for multiple materials and output rates. Spread a wide range of materials accurately, effectively and economically.

Features

- Includes the Standard-Output Tray for free-flowing granular materials
- Single-Tube 'Diamond Design' Commercial epoxy powder coated chassis
