

# WETT-UP

## GRANULAR WETTING AGENT

**Wett-Up Granular Wetting Agent is a specialised non-ionic surfactant designed for use on lawns, garden beds, in pots and on all professional turf areas.**

Wett-Up is an easy to use granular wetting agent designed to assist with water penetration and retention, where soils are dry and repellent to water (hydrophobic). Wett-Up helps reduce moisture stress on the plant. It also limits waste water through run off or evaporation making every drop count.

Available in 2kg, 5kg, 10kg and 20kg.

### Rate:

- Low 2kg/100m<sup>2</sup>  
For regular maintenance recommended monthly throughout warmer months.
- High 3.5kg/100m<sup>2</sup>  
For very dry situations follow up with regular applications.

### Application:

Carefully measure your lawn area (length x width).

Measure the correct amount of Wett-Up.

Apply to a dry lawn evenly. Using an Earthway spreader is recommended.

Irrigate immediately after application with a minimum of 4mm or as much water as possible.

The more you can soak the wetting agent into the soil the better it will perform and stay hydrated.

Use every 2-4 weeks throughout the warmer months.
