

# HOME RUN LS TURF TYPE PERENNIAL RYEGRASS

Home Run LS is a proven performer, ranking very high in the recent NTEP trials. Home Run LS has excellent overall turf quality, ranking in the top statistical category under A, B and C maintenance schedules. So whether you manage intensively or maintain your turfgrass with minimal inputs, Home Run LS can meet your needs. Home Run LS also has great divot recovery and wear tolerance thanks to its LS characteristics. Home Run LS also has excellent overall disease resistance, ranking at the top of the NTEP. When you need to score big, choose Home Run LS.

## Features:

- Top NTEP (A, B and C)
- Top rated divot recovery
- Top rated seedling vigor
- Top rated transition zone disease resistance
- Top rated for all around disease resistance

## Areas of use:

- High-traffic and heavy wear areas
- Professional sports turf tees and fairways
- Sod production
- Lawn and landscape home lawns
- Top-quality overseeding for warm-season turf

## Seeding and overseeding:

Homerun LS readily establishes on loosened bare soil or after verticutting existing turf for renovation and overseeding. For typical new seeding applications, apply at a rate of 3-4kg/ 100m<sup>2</sup>. Periodic reseeding at 2-3kg/100m<sup>2</sup> maintains density for visual appearance and durability. For overseeding dormant warm season grasses use a higher rate.

## Maintenance:

Homerun LS will form a tight-knit turf under a broad range of soil types and environmental conditions, from full sun to medium shade. It will mow cleanly at heights of ½" and above. Due to its tillering ability and compact profile Homerun LS can be maintained at fairway cutting heights when appropriate management practices are observed.
