

How to Fertilise Your Lawn

Regular fertilising is an essential part of lawn maintenance. Our fertiliser range will provide its seasonal requirements to ensure it's lush and green.

1. Carefully measure your lawn area (length x width) and measure the correct amount of fertiliser.
2. Apply to a dry lawn evenly. Using an Earthway fertiliser spreader is the best method.
3. Be careful to sweep off all hard surfaces (concrete or stone paved areas) before irrigating. Fertilising products can stain.
4. This product needs to be irrigated soon after application with around 4mm water or enough to irrigate the fertiliser prill into the thatch and off the leaf.
5. Starter fertiliser should be applied with new lawn sowing and will last 4-6 weeks. Once regular mowing has begun, use an all season maintenance fertiliser or slow release fertiliser.
6. Fertilise a minimum of four times a year.

LANDSCAPE RANGE GOLD PRO FERTILISER

N:P:K: 22:3:4 5kg, 10kg, 20kg

Gold Pro Controlled Release Fertiliser as the name suggests releases the nutrients gradually into the soil. As the nitrogen is released slowly it keeps the lawn green over an extended period of time.

Gold Pro is ideal for use on sandy soil profiles, in high traffic areas and in summer when frequent watering diminishes the lawn of nutrients.

LANDSCAPE RANGE KICKSTART FERTILISER

N:P:K: 5:6:6 2.5kg, 5kg, 10kg, 20kg

KickStart Fertiliser focuses on root development with the key NPK elements providing the right nutrients for a quick and healthy germination.

Phosphorus stimulates root and shoot growth while potassium aids in building and strengthening the plant to enhance resilience.

The nitrogen is at a level that assists with growth and development and low enough not to inhibit the health of the young seedling.

LANDSCAPE RANGE ALL SEASON RENO FERTILISER

N:P:K: 22:5:7 5kg, 10kg, 20kg

All Season Reno is the perfect fertiliser for established lawns, which will benefit from its use with a boost in colour during spring and autumn.

Its high analysis formulation supplies the three major elements for the plants nutrition.
