

SPORTSMAN SEED BLEND

Sportsman is ideal for Council sportsfields and parkland oversowing.

It is a 100% blend of Turf Type Perennial Ryegrass and Sportsturf Perennial Ryegrass.

Sportsman is quick to establish and has good wear tolerance.

PACK SIZE: 25KG

Key Attributes:

- High wear tolerance for sports turf, parkland and sports areas
- Mid green colour
- Quick establishment
- Winter active

Uses:

Sportsman Blend is highly recommended for permanent turf applications, or for winter oversowing of dormant warm season grass.

Sowing & Establishment:

For new sowing, a rate of 3-5kg per 100m² is recommended. For oversowing, a percentage of this rate should be applied proportionate to the amount of existing turf cover.

For moderate existing cover, apply at half the new seeding rate.

During sowing activity, a complete starter fertiliser is recommended at label rates to initiate rapid establishment.

Maintenance:

Sportsman Blend can be mowed as low as 10mm, however the recommended mowing height in most applications is 25mm.

Seasonal application of a balanced NPK fertiliser is recommended to sustain a healthy sward.
