

TURF WICKET SEED BLEND

Turf Wicket Blend has the ability to strike quickly in low temperatures which is vital with early renovation and sporting fixture schedules.

Turf Wicket is a blend of elite Turf-Type Perennial Ryegrasses, selected for rapid germination and fast establishment.

Designed for sports turf managers who need reliable, high-quality Ryegrass cover when the establishment window is short.

Turf Wicket germinates in low temperatures and provides strong tolerance to disease pressure and elevated salt levels, making it well suited to demanding sports turf environments.

Seed Mixture By Count:

100% Blend of Turf-Type Perennial Ryegrasses

Bag Size:

20kgs

Sowing & Establishment:

For new sowing, a rate of 3-5kg per 100m² is recommended. For oversowing, a percentage of this rate should be applied proportionate to the amount of existing turf cover. For moderate existing cover, apply at half the new seeding rate.

During sowing activity, a complete starter fertiliser is recommended at label rates to initiate rapid establishment.

Mowing Height::

Turf Wicket Blend can be mowed as low as 3mm.

Ask about our Evergreen Turf Covers to enhance germination.
